

Energy Sector

Providing you with sustainable solutions.

We provide a range of services, based on our experience

Grant Thornton Energy Sector expertise.

Our executive team consists of 20+ seasoned professionals with international experience. We support our clients by providing services at all levels of their energy market operations. We aim to increase the value of their business and levels of profitability by formulating Business and Risk Management strategies for cost reduction, tackle operational problems and upgrade the quality of services provided.

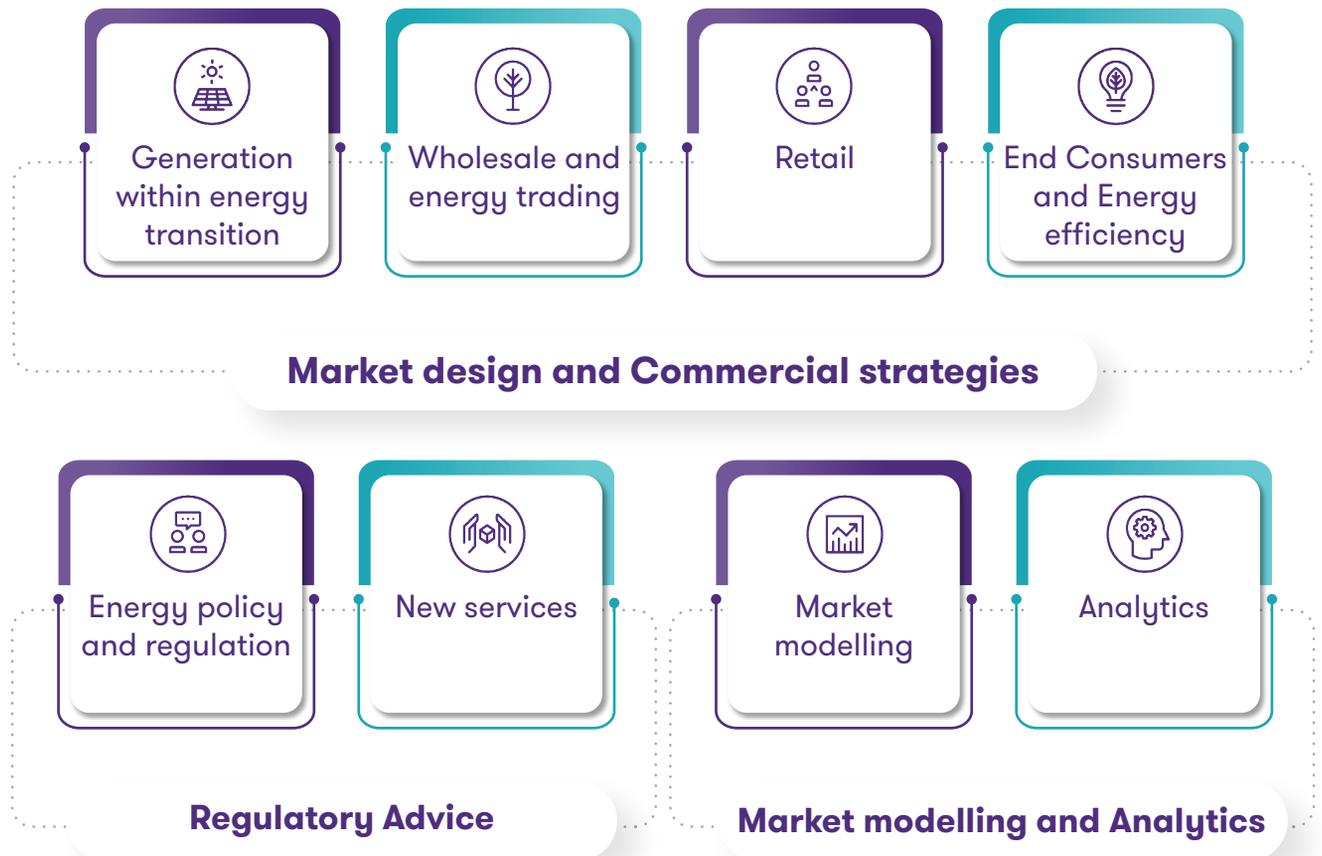

We have significant experience in the design, operation, simulation, and analysis of Energy Systems and competitive Energy Markets (Gas, Electricity and Renewables), having successfully

completed multiple projects in the wider region – EU, MENA, CIS.

We possess expertise in the legal, policy and regulatory aspects of power and gas sectors (Public Authorities, TSOs, DSOs, IPP, etc.), and the required know-how when it comes to the economic regulation of networks.

We provide services on how energy markets work through modelling by using cutting-edge technologies (artificial intelligence, neural networks) and software tools (load forecasting, price forecasting, dispatching through optimization).

Our services across the energy value chain

“Green Transition” services
